Our Ref. EF/2013/173

Dated 20.03.2013

ENERGY CONSERVATION ENGINEERS & MANUFACTURERS
OF MOST EFFICIENT INDUSTRIAL FURNACES

HYDRO DYNE INDUSTRIES
INWARD 645
DATE 21/3/13

TO WHOM SOEVER IT MAY CONCERN

“We are pleased to put on our record that M/s Hydro Dyne Industries has been supplying their manufactured Hydraulic Cylinders to us since early 1990's as per our specifications. The products supplied by M/s Hydro Dyne Industries are found to be of very high quality & in most of the cases the cylinders have lasted more than 5 to 7 years before change of 1st seal while operating in very tough environment.

We may also state that as of today, there has been zero rejections of products supplied by them and these cylinders have been fitted straight to our jobs without modifications & corrections.

We have no hesitation in recommending Hydraulic Cylinder for any furnace or critical applications.”
