TO WHOM SOEVER IT MAY CONCERN.

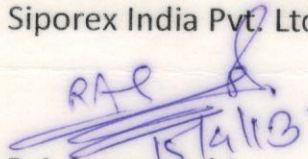

"We are pleased to put on our record that M/s Hydro Dyne Industries has been supplying their manufactured Hydraulic Cylinders to us since early 1996 as per our specifications. The products supplied by M/s Hydro Dyne Industries are found to be of very high quality & in most of the cases the cylinders have lasted more than 4 to 5 years before change of 1<sup>st</sup> seal while operating in very tough environment.

We may also state that as of today, there has been zero rejections of products supplied by them and these cylinders have been fitted straight to our jobs without modifications & corrections.

We have no hesitation in recommending Hydraulic Cylinder for any furnace or critical applications."

For,

Siporex India Pvt. Ltd.
